

Figure 1 is a dot plot showing the distribution of the number of hours per week spent on housework for men and women aged 15-64 years in 1995. The x-axis represents hours per week (1H, 2H, 3H, 4H, 5H, 6H, 7H). The y-axis represents the percentage of the population. For each hour category, there are two horizontal lines with dots: a solid line for men and a dashed line for women. The distribution is generally skewed to the right, with most people spending 1-4 hours per week. Men tend to spend more hours than women in the 1H, 2H, and 3H categories, while women tend to spend more hours in the 4H, 5H, and 6H categories.

1H 2H 3H 4H 5H 6H 7H
